**PROPOSED PART 70 OPERATING PERMIT 2600-00071-V3**

**BOBCAT COMPRESSOR STATION  
BOBCAT GAS STORAGE, LLC  
PORT BARRE, ST. LANDRY PARISH, LOUISIANA  
Agency Interest (AI) No. 127089  
Activity No. PER20100001**

**I. APPLICANT**

Applicant: Bobcat Gas Storage, LLC  
11200 Westheimer Road, Suite 625  
Houston, Texas 77042

Facility: Bobcat Compressor Station

SIC Code: 4922

Location: 19210 Highway 190, Port Barre, LA 70577

**II. PERMITTING AUTHORITY**

Louisiana Department of Environmental Quality  
Office of Environmental Services  
P.O. Box 4313  
Baton Rouge, Louisiana 70821-4313

**III. CONTACT INFORMATION**

Mr. Dan Nguyen  
P.O. Box 4313  
Baton Rouge, Louisiana 70821-4313  
Phone: (225) 219-3181

**IV. FACILITY BACKGROUND AND CURRENT PERMIT STATUS**

Bobcat Gas Storage owns and operates the Bobcat Compressor Station, a natural gas compressor station near Port Barre, St. Landry Parish under Part 70 operating permit 2600-00071-V2, dated June 17, 2009. The permit was amended November 10, 2009. This permit addresses all emissions unit at the Facility.

---

<sup>1</sup> 40 CFR 70.7(a)(5) and LAC 33:III.531.A.4 require the permitting authority to "provide a statement that sets forth the legal and factual basis for the proposed permit conditions of any permit issued to a Part 70 source, including references to the applicable statutory or regulatory provisions."

## STATEMENT OF BASIS

### BOBCAT COMPRESSOR STATION BOBCAT GAS STORAGE, LLC PORT BARRE, ST. LANDRY PARISH, LOUISIANA Agency Interest (AI) No. 127089 Activity No. PER20100001 Proposed Permit No. 2600-00071-V3

#### V. PROPOSED PERMIT/PROJECT INFORMATION

A permit application dated January 8, 2010, was received requesting a permit modification. The application was deemed administratively complete in accordance with LAC 33:III.519.A on January 15, 2010.

##### Process Description

Bobcat Gas Storage receives natural gas via pipeline and injects it into storage caverns (salt domes). Upon demand, natural gas is withdrawn from the caverns, dehydrated, and sent to sales pipeline. Existing equipment at the facility includes compressor engines with catalytic converters, two glycol dehydration units, a thermal oxidizer, storage tanks, truck loading operations, and associated support equipment.

##### Proposed Modifications

Bobcat Gas Storage proposes to install 1) five 8180 horsepower compressor engines (CAT 16CM34) to replace three proposed 4735 horsepower units (CAT G3616), 2) two 300 MMscf/day triethylene glycol dehydration units with a thermal oxidizer as the control device, 3) a natural gas fired emergency generator, and 4) several miscellaneous tanks and insignificant activities. Total operating times of compressor engines is limited to 278.17 million hp-hour/year.

#### VI. ATTAINMENT STATUS OF PARISH

<u>Pollutant</u>	<u>Attainment Status</u>	<u>Designation</u>
PM <sub>2.5</sub>	Attainment	N/A
PM <sub>10</sub>	Attainment	N/A
SO <sub>2</sub>	Attainment	N/A
NO <sub>2</sub>	Attainment	N/A
CO	Attainment	N/A
Ozone <sup>2</sup>	Attainment	N/A
Lead	Attainment	N/A

<sup>2</sup> VOC and NO<sub>x</sub> are regulated as surrogates.

## STATEMENT OF BASIS

### BOBCAT COMPRESSOR STATION BOBCAT GAS STORAGE, LLC PORT BARRE, ST. LANDRY PARISH, LOUISIANA Agency Interest (AI) No. 127089 Activity No. PER20100001 Proposed Permit No. 2600-00071-V3

#### VII. PERMITTED AIR EMISSIONS

Sources of air emissions are listed on the "Inventories" page of the proposed permit. Estimated emissions of criteria pollutants from the facility, in tons per year (TPY), are as follows:

Pollutant	Before	After	Change
PM <sub>10</sub>	0.36	0.68	+ 0.32
SO <sub>2</sub>	0.58	0.58	-
NO <sub>x</sub>	183.82	229.04	+ 45.22
CO	58.56	67.82	+ 9.26
VOC	148.89	227.23	+ 78.34

PM<sub>10</sub> and VOC compounds classified as LAC 33:III.Chapter 51-regulated toxic air pollutants (TAP) are speciated below. This list encompasses all Hazardous Air Pollutants (HAP) regulated pursuant to Section 112 of the Clean Air Act. Note, however, all TAPs are not HAPs (e.g., ammonia, hydrogen sulfide).

Pollutant	Before	After	Change
Benzene	8.59	17.55	+ 8.96
Ethyl Benzene	0.11	0.13	+ 0.02
Formaldehyde	28.80	25.62	- 3.18
Methanol	0.13	0.27	+ 0.14
n-Hexane	0.97	2.94	+ 1.97
Toluene	7.77	15.83	+ 8.06
Xylenes	0.04	0.06	+ 0.02
Total	46.41	62.40	+ 15.99

Facility is a 1) major source of criteria pollutants (Title V), 2) a minor source of PSD, 3) a major source of HAPs, and 4) a minor source of TAPs.

Permitted limits for individual emissions units and groups of emissions units, if applicable, are set forth in the tables of the proposed permit entitled "Emission Rates for Criteria Pollutants" and "Emission Rates for TAP/HAP & Other Pollutants." These tables are part of the permit.

Emissions calculations can be found in Section 4 of the permit application. The calculations address the manufacturer's specifications, fuel composition (e.g., sulfur content), emissions factors, and other assumptions on which the emissions limitations are based and have been reviewed by the permit writer for accuracy.

## STATEMENT OF BASIS

**BOBCAT COMPRESSOR STATION  
BOBCAT GAS STORAGE, LLC  
PORT BARRE, ST. LANDRY PARISH, LOUISIANA  
Agency Interest (AI) No. 127089  
Activity No. PER20100001  
Proposed Permit No. 2600-00071-V3**

### General Condition XVII Activities

No General Condition XVII Activities are listed in this permit.

### Insignificant Activities

The emissions units or activities listed in Section IX of the proposed permit have been classified as insignificant pursuant to LAC 33:III.501.B.5. By such listing, the LDEQ exempts these sources or types of sources from the requirement to obtain a permit under LAC 33:III.Chapter 5. However, such emissions are considered when determining the facility's potential to emit for evaluation of applicable requirements.

## VIII. REGULATORY APPLICABILITY

Regulatory applicability is discussed in three sections of the proposed permit: Section X (Table 1), Section XI (Table 2), and Specific Requirements. Each is discussed in more detail below.

### Section X (Table 1): Applicable Louisiana and Federal Air Quality Requirements

Section X (Table 1) summarizes all applicable federal and state regulations. In the matrix, a "1" represents a regulation applies to the emissions unit. A "1" is also used if the emissions unit is exempt from the emissions standards or control requirements of the regulation, but monitoring, recordkeeping, and/or reporting requirements apply.

A "2" is used to note that the regulation has requirements that would apply to the emissions unit, but the unit is exempt from these requirements due to meeting a specific criterion, such as it has not been constructed, modified, or reconstructed since the regulation has been effective. If the specific criterion changes, the emissions unit will have to comply at a future date. Each "2" entry is explained in Section XI (Table 2).

A "3" signifies that the regulation applies to this general type of source (e.g., furnace, distillation column, boiler, fugitive emissions, etc.), but does not apply to the particular emissions unit. Each "3" entry is explained in Section XI (Table 2).

If blank, the regulation clearly does not apply to this type of emissions unit.

## STATEMENT OF BASIS

### BOBCAT COMPRESSOR STATION BOBCAT GAS STORAGE, LLC PORT BARRE, ST. LANDRY PARISH, LOUISIANA Agency Interest (AI) No. 127089 Activity No. PER20100001 Proposed Permit No. 2600-00071-V3

#### Section XI (Table 2): Explanation for Exemption Status or Non-Applicability of a Source

Section XI (Table 2) of the proposed permit provides explanation for either the exemption status or non-applicability of given federal or state regulation cited by 2 or 3 in the matrix presented in Section X (Table 1).

#### Specific Requirements

Applicable regulations, as well as any additional monitoring, recordkeeping, and reporting requirements necessary to demonstrate compliance with both the federal and state terms and conditions of the proposed permit, are provided in the “Specific Requirements” section. Any operating limitations (e.g., on hours of operation or throughput) are also set forth in this section. Associated with each Specific Requirement is a citation of the federal or state regulation upon which the authority to include that Specific Requirement is based.

#### **1. Federal Regulations**

##### 40 CFR 60 – New Source Performance Standards (NSPS)

The following subparts are applicable at the station: A and JJJJ. Applicable emission standards, monitoring, test methods and procedures, recordkeeping, and reporting requirements are summarized in the “Specific Requirements” section of the proposed permit.

##### 40 CFR 61 – National Emission Standards for Hazardous Air Pollutants (NESHAP)

No NESHAP provisions are applicable to the Facility.

##### 40 CFR 63 – Maximum Achievable Control Technology (MACT)

The following subparts are applicable at the station: A, HHH, and ZZZZ. Applicable emission standards, monitoring, test methods and procedures, recordkeeping, and reporting requirements are summarized in the “Specific Requirements” section of the proposed permit.

##### Clean Air Act §112(g) or §112(j) – Case-By-Case MACT Determinations

A case-by-case MACT determination pursuant to §112(g) or §112(j) of the Clean Air Act was not required.

## STATEMENT OF BASIS

**BOBCAT COMPRESSOR STATION  
BOBCAT GAS STORAGE, LLC  
PORT BARRE, ST. LANDRY PARISH, LOUISIANA  
Agency Interest (AI) No. 127089  
Activity No. PER20100001  
Proposed Permit No. 2600-00071-V3**

### 40 CFR 64 – Compliance Assurance Monitoring (CAM)

Per 40 CFR 64.2(a), CAM applies to each pollutant-specific emissions unit (PSEU) that 1) is subject to an emission limitation or standard, 2) uses a control devices to achieve compliance, and 3) has potential pre-control device emissions that are equal to or greater than 100 percent of the amount, in TPY, required for a source to be classified as a major source.

No CAM provisions are applicable to the station.

### Acid Rain Program

The Acid Rain Program, 40 CFR Part 72 – 78, applies to the fossil fuel-fired combustion devices listed in Tables 1-3 of 40 CFR 73.10 and other utility units, unless a unit is determined not to be an affected unit pursuant to 40 CFR 72.6(b). LDEQ has incorporated the Acid Rain Program by reference at LAC 33:III.505. The station is not subject to the Acid Rain Program.

## **2. SIP-Approved State Regulations**

Applicable state regulations are also noted in Section X (Table 1) of the proposed permit. Some state regulations have been approved by the U.S. Environmental Protection Agency (EPA) as part of Louisiana's State Implementation Plan (SIP). These regulations are referred to as "SIP-approved" and are enforceable by both LDEQ and EPA. All LAC 33:III.501.C.6 citations are federally enforceable unless otherwise noted.

## **3. State-Only Regulations**

Individual chapters or sections of LAC 33:III noted by an asterisk in Section X (Table 1) are designated "state-only" pursuant to 40 CFR 70.6(b)(2). Terms and conditions of the proposed permit citing these chapters or sections are not SIP-approved and are not subject to the requirements of 40 CFR Part 70. These terms and conditions are enforceable by LDEQ, but not EPA. All conditions not designated as "state-only" are presumed to be federally enforceable.

**STATEMENT OF BASIS**

**BOBCAT COMPRESSOR STATION  
BOBCAT GAS STORAGE, LLC  
PORT BARRE, ST. LANDRY PARISH, LOUISIANA  
Agency Interest (AI) No. 127089  
Activity No. PER20100001  
Proposed Permit No. 2600-00071-V3**

**IX. NEW SOURCE REVIEW (NSR)****1. Prevention of Significant Deterioration (PSD)**

The facility's source category is not listed in Table A of the definition of "major stationary source" in LAC 33:III.509. As such, the PSD major source threshold is 250 TPY (of any regulated NSR pollutant). Facility is not classified as a major stationary source under the PSD program. Thus, PSD review is not required.

**2. Nonattainment New Source Review (NNSR)**

Facility is located in an attainment area; therefore, NNSR does not apply.

**3. Notification of Federal Land Managers (FLM)**

Since both PSD and NNSR are not applicable, notification to the FLM is not required.

**4. Reasonable Possibility**

Since the station is located in an attainment area for all criteria pollutants and is classified as minor source under the PSD program, then there is no "reasonable possibility" that the proposed project may result in a significant emissions increase.

**X. ADDITIONAL MONITORING AND TESTING REQUIREMENTS**

In addition to the monitoring and testing requirements set forth by applicable state and federal regulations (see Section VIII of this Statement of Basis), a number of "LAC 33:III.507.H.1.a" and/or "LAC 33:III.501.C.6" conditions may appear in the "Specific Requirements" section of the proposed permit. These conditions have been added where no applicable regulation exists or where an applicable regulation does not contain sufficient monitoring, recordkeeping, and/or reporting provisions to ensure compliance. LAC 33:III.507.H.1.a provisions, which may include recordkeeping requirements, are intended to fulfill Part 70 periodic monitoring obligations under 40 CFR 70.6(a)(3)(i)(B).

ID	Description	Pollutant	Method	Frequency
	(None)			

## STATEMENT OF BASIS

**BOBCAT COMPRESSOR STATION  
BOBCAT GAS STORAGE, LLC  
PORT BARRE, ST. LANDRY PARISH, LOUISIANA  
Agency Interest (AI) No. 127089  
Activity No. PER20100001  
Proposed Permit No. 2600-00071-V3**

### **XI. OPERATIONAL FLEXIBILITY**

#### Emissions Caps

An emissions cap is a permitting mechanism to limit allowable emissions of two or more emissions units below their collective potential to emit (PTE). The proposed permit does establish an emissions cap. To limit NO<sub>x</sub> and VOC emissions below the PSD major source thresholds of 250 tons/year, total operating times of compressor engines is limited to 278.17 million hp-hour/year. Operating times of each compressor engine will be monitored continuously and totalized monthly. Total operating times of all compressor engines will be calculated monthly for the preceding twelve consecutive month period. These data shall be reported annually.

#### Alternative Operating Scenarios

LAC 33:III.507.G.5 allows the owner or operator to operate under any operating scenario incorporated in the permit. Any reasonably anticipated alternative operating scenarios may be identified by the owner or operator through a permit application and included in the permit. The proposed permit does not include an alternative operating scenario.

#### Streamlined Requirements

When applicable requirements overlap or conflict, the permitting authority may choose to include in the permit the requirement that is determined to be most stringent or protective as detailed in EPA's "White Paper Number 2 for Improved Implementation of the Part 70 Operating Permits Program" (March 5, 1996). The overall objective is to determine the set of permit terms and conditions that will assure compliance with all applicable requirements for an emissions unit or group of emissions units so as to eliminate redundant or conflicting requirements. The proposed permit does not contain streamlined provisions.

#### *Louisiana Consolidated Fugitive Emission Program (LCFEP)*

Facility does not comply with a streamlined equipment leak monitoring program.

### **XII. PERMIT SHIELD**

A permit shield, as described in 40 CFR 70.6(f) and LAC 33:III.507.I, provides an "enforcement shield" which protects the facility from enforcement action for violations of applicable federal requirements. It is intended to protect the facility from liability for violations if the permit does not accurately reflect an applicable federal or federally enforceable requirement. The proposed permit does not establish a permit shield.

## STATEMENT OF BASIS

### BOBCAT COMPRESSOR STATION BOBCAT GAS STORAGE, LLC PORT BARRE, ST. LANDRY PARISH, LOUISIANA Agency Interest (AI) No. 127089 Activity No. PER20100001 Proposed Permit No. 2600-00071-V3

#### XIII. IMPACTS ON AMBIENT AIR

Emissions associated with the proposed renewal were reviewed by the Air Quality Assessment Division to ensure compliance with the NAAQS and AAS. LDEQ did not require the applicant to model emissions.

#### XIV. COMPLIANCE HISTORY AND CONSENT DECREES

No federal or state actions have been issued since the existing permit for the Facility was issued.

#### XV. REQUIREMENTS THAT HAVE BEEN SATISFIED

The following state and/or federal obligations have been satisfied and are therefore not included as Specific Requirements.

Source ID	Citation	Description
EQT0001, EQT0005	40 CFR 60 Subpart JJJJ	Stack test for NOX, CO and Total
EQT0006	40 CFR 63 Subpart ZZZZ	Hydrocarbons
EQT0009	40 CFR 63 Subpart HHH LAC 33:III.2116	Stack test for Total Hydrocarbons

#### XVI. OTHER REQUIREMENTS

Executive Order No. BJ 2008-7 directs all state agencies to administer their regulatory practices, programs, contracts, grants, and all other functions vested in them in a manner consistent with Louisiana's Comprehensive Master Plan for a Sustainable Coast and public interest to the maximum extent possible. If a proposed facility or modification is located in the Coastal Zone, LDEQ requires the applicant to document whether or not a Coastal Use Permit is required, and if so, whether it has been obtained. Coastal Use Permits are issued by the Coastal Management Division of the Louisiana Department of Natural Resources (LDNR).

The facility is not located in the Coastal Zone; therefore, a Coastal Use Permit is not required.

## **STATEMENT OF BASIS**

### **XVII. PUBLIC NOTICE/PUBLIC PARTICIPATION**

Written comments, written requests for a public hearing, or written requests for notification of the final decision regarding this permit action may be submitted to:

Ms. Soumaya Ghosn  
LDEQ, Public Participation Group  
P.O. Box 4313  
Baton Rouge, Louisiana 70821-4313

Written comments and/or written requests must be received prior to the deadline specified in the public notice. If LDEQ finds a significant degree of public interest, a public hearing will be held. All comments will be considered prior to a final permit decision.

LDEQ will send notification of the final permit decision to the applicant and to each person who has submitted written comments or a written request for notification of the final decision.

The permit application, proposed permit, and this Statement of Basis are available for review at LDEQ, Public Records Center, Room 127, 602 North 5th Street, Baton Rouge, Louisiana. Viewing hours are from 8:00 a.m. to 4:30 p.m., Monday through Friday (except holidays). Additional copies may be viewed at the local library identified in the public notice. The available information can also be accessed electronically via LDEQ's Electronic Document Management System (EDMS) on LDEQ's public website, [www.deq.louisiana.gov](http://www.deq.louisiana.gov).

Inquiries or requests for additional information regarding this permit action should be directed to the contact identified on page 1 of this Statement of Basis.

Persons wishing to be included on the public notice mailing list or for other public participation-related questions should contact LDEQ's Public Participation Group at P.O. Box 4313, Baton Rouge, LA 70821-4313; by e-mail at [maillistrequest@ldeq.org](mailto:maillistrequest@ldeq.org); or contact LDEQ's Customer Service Center at (225) 219-LDEQ (219-5337). Alternatively, individuals may elect to receive public notices via e-mail by subscribing to LDEQ's Public Notification List Service at [http://www.doa.louisiana.gov/oes/listservpage/ldeq\\_pn\\_listserv.htm](http://www.doa.louisiana.gov/oes/listservpage/ldeq_pn_listserv.htm).

Permit public notices can be viewed at LDEQ's "Public Notices" webpage, <http://www.deq.louisiana.gov/apps/pubNotice/default.asp>. Electronic access to each proposed permit and Statement of Basis current on notice is also available on this page. General information related to public participation in permitting activities can be viewed at [www.deq.louisiana.gov/portal/tabid/2198/Default.aspx](http://www.deq.louisiana.gov/portal/tabid/2198/Default.aspx).

## STATEMENT OF BASIS

### BOBCAT COMPRESSOR STATION BOBCAT GAS STORAGE, LLC PORT BARRE, ST. LANDRY PARISH, LOUISIANA Agency Interest (AI) No. 127089 Activity No. PER20100001 Proposed Permit No. 2600-00071-V3

## APPENDIX B – GLOSSARY

*Best Available Control Technologies (BACT)* – an emissions limitation (including a visible emission standard) based on the maximum degree of reduction for each pollutant subject to regulation under this Part (Part III) which would be emitted from any proposed major stationary source or major modification which the administrative authority, on a case-by-case basis, taking into account energy, environmental, and economic impacts and other costs, determines is achievable for such source or modification through application of production processes or available methods, systems, and techniques, including fuel cleaning or treatment or innovative fuel combustion techniques for control of such pollutant.

*CAM - Compliance Assurance Monitoring* – A federal air regulation under 40 CFR Part 64.

*Carbon Monoxide (CO)* – (Carbon monoxide) a colorless, odorless gas produced by incomplete combustion of any carbonaceous (gasoline, natural gas, coal, oil, etc.) material.

*Cooling Tower* – A cooling system used in industry to cool hot water (by partial evaporation) before reusing it as a coolant.

*Continuous Emission Monitoring System (CEMS)* – The total combined equipment and systems required to continuously determine air contaminants and diluent gas concentrations and/or mass emission rate of a source effluent.

*Cyclone* – A control device that uses centrifugal force to separate particulate matter from the carrier gas stream.

*Federally Enforceable Specific Condition* – A federally enforceable specific condition written to limit the potential to Emit (PTE) of a source that is permanent, quantifiable, and practically enforceable. In order to meet these requirements, the draft permit containing the federally enforceable specific condition must be placed on public notice and include the following conditions:

- A clear statement of the operational limitation or condition which limits the source's potential to emit;
- Recordkeeping requirements related to the operational limitation or condition;
- A requirement that these records be made available for inspection by LDEQ personnel;
- A requirement to report for the previous calendar year.

*Grandfathered Status* – those facilities that were under actual construction or operation as of June 19, 1969, the signature date of the original Clean Air Act. These facilities are not required to obtain a permit. Facilities that are subject to Part 70 (Title V) requirements lose grandfathered status and must apply for a permit.

## STATEMENT OF BASIS

**BOBCAT COMPRESSOR STATION  
BOBCAT GAS STORAGE, LLC  
PORT BARRE, ST. LANDRY PARISH, LOUISIANA  
Agency Interest (AI) No. 127089  
Activity No. PER20100001  
Proposed Permit No. 2600-00071-V3**

## APPENDIX B – GLOSSARY

*Lowest Achievable Emission Rate (LAER)* – for any source, the more stringent rate of emissions based on the following:

- a. the most stringent emissions limitation that is contained in the implementation plan of any state for such class or category of major stationary source, unless the owner or operator of the proposed stationary source demonstrates that such limitations are not achievable; or
- b. the most stringent emissions limitation that is achieved in practice by such class or category of stationary source. This limitation, when applied to a modification, means the lowest achievable emissions rate for the new or modified emissions units within the stationary source. In no event shall the application of this term permit a proposed new or modified major stationary source to emit any pollutant in excess of the amount allowable under an applicable new source standard of performance.

*NESHAP* – National Emission Standards for Hazardous Air Pollutants – Air emission standards for specific types of facilities, as outlined in 40 CFR Parts 61 through 63.

*Maximum Achievable Control Technology (MACT)* – the maximum degree of reduction in emissions of each air pollutant subject to LAC 33:III.Chapter 51 (including a prohibition on such emissions, where achievable) that the administrative authority, upon review of submitted MACT compliance plans and other relevant information and taking into consideration the cost of achieving such emission reduction, as well as any non-air-quality health and environmental impacts and energy requirements, determines is achievable through application of measures, processes, methods, systems, or techniques.

*NSPS* – New Source Performance Standards – Air emission standards for specific types of facilities, as outlined in 40 CFR Part 60.

*New Source Review (NSR)* – a preconstruction review and permitting program applicable to new or modified major stationary sources of criteria air pollutants regulated under the Clean Air Act (CAA). NSR is required by Parts C (“Prevention of Significant Deterioration of Air Quality”) and D (“Nonattainment New Source Review”).

*Nonattainment New Source Review (NNSR)* – a New Source Review permitting program for major sources in geographic areas that do not meet the National Ambient Air Quality Standards (NAAQS) set forth at 40 CFR Part 50. NNSR is designed to ensure that emissions associated with new or modified sources will be regulated with the goal of improving ambient air quality.

*Organic Compound* – any compound of carbon and another element. Examples: methane (CH<sub>4</sub>), ethane (C<sub>2</sub>H<sub>6</sub>), carbon disulfide (CS<sub>2</sub>).

## STATEMENT OF BASIS

**BOBCAT COMPRESSOR STATION

Agency Interest (AI) No. 127089  
Activity No. PER20100001  
Proposed Permit No. 2600-00071-V3**

## APPENDIX B – GLOSSARY

*Part 70 Operating Permit* – also referred to as a Title V permit, required for major sources as defined in 40 CFR 70 and LAC 33:III.507.

*PM<sub>10</sub>* – particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers as measured by the method in Title 40, Code of Federal Regulations, Part 50, Appendix J.

*Potential to Emit (PTE)* – the maximum capacity of a stationary source to emit any air pollutant under its physical and operational design.

*Prevention of Significant Deterioration (PSD)* – a New Source Review permitting program for major sources in geographic areas that meet the National Ambient Air Quality Standards (NAAQS) at 40 CFR Part 50. PSD requirements are designed to ensure that the air quality in attainment areas will not degrade.

*Selective Catalytic Reduction (SCR)* – A non-combustion control technology that destroys NO<sub>x</sub> by injecting a reducing agent (e.g., ammonia) into the flue gas that, in the presence of a catalyst (e.g., vanadium, titanium, or zeolite), converts NO<sub>x</sub> into molecular nitrogen and water.

*Sulfur Dioxide (SO<sub>2</sub>)* – An oxide of sulphur.

*TAP* – LDEQ acronym for toxic air pollutants regulated under LAC 33 Part III, Chapter 51, Tables 1 through 3.

*“Top Down” Approach* – An approach which requires use of the most stringent control technology found to be technically feasible and appropriate based on environmental, energy, economic, and cost impacts.

*Title V permit* – see Part 70 Operating Permit.

*Volatile Organic Compound (VOC)* – any organic compound which participates in atmospheric photochemical reactions; that is, any organic compound other than those which the Administrator of the U.S. Environmental Protection Agency designates as having negligible photochemical reactivity.
